

POUR MILITAIRES POLICE ET AUTORITES

Tireur d'élite ou observateur utilisant une Camera Vidéo a couplage prismatique sur la lunette de visée ou d'observation. Le Directeur des opérations ou de l'entraînement des tireurs, reçoit les images de plusieurs postes de tir et est en mesure d'apprécier la situation en temps réel. Les performances en entrainement sont ainsi confirmées et les prises de décision en opérationnel sont mieux évaluées et certifiées. (applications similaires pour piétons et gardes du corps en observation discrète)

L'ensemble des données Vidéo et data Ethernet temps réel sont complétées et acheminées vers les QG par des équipements Radio et des Relais complémentaires, aériens, maritimes et terrestres. Ces matériels existent dans des gammes de fréquences allant de 40 MHz à 26 GHz selon les applications et les débits nécessaires.

Customised solutions: Mobile ControlCenter

Mobile Control Centers are portable wireless systems integrated in hard cover cases. They are always customised and include all components you will need for your special applications. There are receiver cases with TFT monitors, external antennas, diversity function, integrated DVR etc, but also transmitter cases with cameras are available on request. If you are interested in a cased solution, to have a mobile and independent surveillance system, please contact us. We plan and produce the cases according to your requirements.

- » specific solutions for your application
- » choose the components among our products
- » all connectors according to your requirements
- » transmitters and receivers with COFDM or F3F modulation
- » accessories like PTZ cameras, multiplexers etc
- » Ideal systems for mobile applications

Single components

Hard cover case

- » Extreme robust plastic material
- » Large variety of different sizes
- » Valves for pressure compensation
- » Outdoor / dustproof (open, closed)

TFT Monitors

- » Display sizes from 5.6" to 15"
- » Sunlight readable displays
- » Several displays in one case
- » Display switch-off function (save energy)

Receiver

- » Digital and analogue receivers
- » Several receivers in one case
- » Internal and external antennas
- » Diversity antenna system
- » Free choice of frequency

Transmitter

- » Digital and analogue transmitters
- » Several transmitters in one case
- » Internal and external antennas
- » Different transmission power up to 10W RF
- » Free choice of frequency

- » switchable 5.6" TFT display,
- » digital O.R.C.A Power Transmitter 10W (HF)
- » 868MHz Telemetry Transceiver for camera control (pan, tilt, zoom, focus etc.)
- » internal Li-Po batteries with level control
- » incl. Mini-Pan-Tilt-Camera EVI-D70

Telemetry

- » Digital 868MHz transceiver for digital bidirectional data transmission
- » For control of PTZ cameras
- » Control of all camera functions such as pan, tilt, zoom, focus, iris, speed, day/night, presets etc.
- » Different transmission power up to 4W

Digital Video Recorder

- » Digital recording and hard disk storage
- » High video quality
- » TFT displays to watch the recorded video
- » USB interfaces for PC connection

Cameras

- » Different type of cameras
- » Integrated cameras
- » High performance PTZ or Cylinder cameras

Quad Processors

- » Divided monitor for several receivers in one case
- » Display of several camera pictures

Batteries

- » Integrated batteries for independent operation
- » Choose between lead, lithium ion or lithium polymer batteries
- » Capacities to 100Ah

External connectors

- » Video in- and outputs on request
- » Head sets and microphones
- » Choice of sockets (RCA, BNC, LEMO etc.)

- » switchable 5.6" TFT displays
- » digital O.R.C.A 2-Channel Diversity Receiver
- » extra small suitcase, only 270 x 246 x 124mm
- » internal Li-Po batteries with level control
- » status display for transmitters voltage level
- » switchable OSD menu
